Victor Lopes dos Santos

Full Stack Software Developer (Mobile & Web)

Salvador, Brazil

victorlopes9291@gmail.com | +55 71 98471-3025

Portfolio | LinkedIn | GitHub | Medium

Professional Summary

Full Stack Software Developer with solid experience building end-to-end cross-platform mobile and web applications. Specialized in Flutter, React, and backend development using **Spring Boot, Flask, Node.js, and ASP.NET MVC**. Proven track record of delivering production-ready applications used by real users, including healthcare solutions powered by artificial intelligence and computer vision. Comfortable owning features throughout the entire development lifecycle, from design and architecture to deployment in agile and fast-paced environments.

Professional Experience

Open System Tecnologia | Software Developer Sep 2026 – Present

- Backend development using **C#, .NET, and ASP.NET Core**, including the implementation and maintenance of RESTful APIs with Web API.
- Frontend development using **React**.
- Development and maintenance of mobile applications using **Xamarin**.
- Implementation and integration of REST APIs to enable communication between applications and services.
- Maintenance and enhancement of existing applications, focusing on **code optimization, performance improvements, and application efficiency**.

Horizon — Innovation & Technology | Full Stack Developer Jun 2025 – Present

- Developed and maintained cross-platform Flutter applications for Android and iOS.
- Contributed to the development of a native Android application designed for field operations performed by epidemiological surveillance agents, with emphasis on **offline-first architecture** and reliable data synchronization.
- Designed and implemented scalable RESTful APIs enabling efficient communication between frontend and backend services.
- Responsible for the complete mobile application lifecycle, including App Store and Google Play releases, version management, and post-launch maintenance.
- Built complete backend solutions using Supabase, including authentication, PostgreSQL, storage, realtime services, and edge functions.
- Developed web and hybrid applications using React and Capacitor, integrating native capabilities such as camera access, file system operations, and push notifications.
- Created **Python and Selenium web automation scripts**, streamlining repetitive workflows and reducing operational effort across the team.
- Leveraged AI-assisted development tools (Lovable, Cursor) to accelerate feature delivery, reducing the average implementation time for medium-complexity features from **1–2 weeks to 2–3 days** while maintaining code quality and documentation standards.

Computação Brasil | Full Stack Developer Jan 2023 – Jun 2025

- Developed a healthcare research application focused on **computer vision-based wound recognition**, delivered as a cross-platform Flutter application capable of providing **instant diagnosis without requiring laboratory analysis**.
- Designed and implemented image processing and classification pipelines using **OpenCV and Python**, achieving approximately **85% model accuracy**.
- Developed and maintained ERP and management systems using **ASP.NET MVC** within a microservices architecture.
- Integrated Firebase services (Authentication, Firestore, Cloud Messaging, Storage), enabling real-time synchronization and offline-first capabilities.
- Implemented **unit, widget, and integration tests** using **flutter_test and Mockito**, significantly improving application stability and reducing regression issues across releases.

Technical Skills

Programming Languages:	Dart, JavaScript, TypeScript, Python, Java, C#
Frontend:	React, HTML, CSS
Mobile:	Flutter, Android (Java), iOS, Capacitor
Backend:	Spring Boot, Flask, ASP.NET MVC, RESTful APIs, Node.js
Databases:	PostgreSQL, SQLite, Firebase, Supabase, Realm
DevOps & Version Control:	Git, Gitflow, Pull Requests, Code Review
Testing:	Unit, Widget, and Integration Testing (flutter_test, Mockito, pytest)
Automation:	Python, Selenium, Prompt Engineering, LLM-based Development Tools (Cursor, Lovable, Claude)
Tools:	Figma, VS Code, IntelliJ IDEA, Postman
Methodologies:	Scrum, Kanban

Education

Federal Institute of Bahia (IFBA) — Salvador, Brazil
Associate Degree in Systems Analysis and Development — Jul 2022 – Feb 2026

English: Professional Working Proficiency

Additional Activities

- Technical writer on Medium, publishing practical content about Flutter, mobile architecture, and full stack software development.
- Personal projects focused on SaaS platforms, AI-powered applications, and scalable frontend architectures.

Certifications

- The Complete Spring Boot Development Bootcamp — Udemy
- Java and Spring Boot Training — Alura
- Introduction to Software Testing — Tomorrow (UFBA)
- Mobile Application Development — Tomorrow (UFBA)
